

Spatial data integration environment "GeoMeta"

O.M. Ataeva, K.A. Kuznetsov, V.I. Filippov, V.A. Serebriakov

Abstract

The spatial data portal GeoMeta is described as a standardized and decentralized spatial information management environment, designed for access to geodata, cartographic products and related metadata from various sources. The main features of the portal are discussed, with the accent on the expansions, realized in its last versions.

Key words: spatial data, spatial data infrastructure, geoportal, metadata.
