

Integration capabilities of Digital library management system LibMeta

Kalenkova A.A., Serebriakov V.A.

Abstract

Digital library management system LibMeta is presented. It provides a means of library and museum metadata integration. Metadata schema of Digital library management system LibMeta which is based on ENIP schema is exposed. It contains main, library profiles and also profiles to work with museum and media objects. Integration of information from different sources could lead to duplication of resource descriptions. Detailed integration algorithm is given; it helps to avoid duplication of resource descriptions.

Key words: digital library, metadata, data integration.
